Naprostá většina semen drží klíčivost minimálně 4-5 let, mnoho druhů přeléhá v zemi i několik let po vysetí. Proto nevyklíčené výsevy po první nebo druhé zimě (zvláště za současných mírných zim) nevyhazujte, nejsou To letničky a klíčí i po 3-4 letech. Při objednávce uveďte náhradní druhy, některá semena jsou v omezeném množství.
